

United Nations Climate Change Conference COP 16 Mexico - ESANS Delegation List (Final - November 13, 2010)

This final version of our Delegation list is now “locked” into the UN computer system, and can not be changed. The UN quota we received in October, is about half of the size of the list of persons Nominated by ESANS in September. The Delegation List is the result of consultations with those nominated, and the changing circumstances of all involved. The ESANS Delegation reflects the broad based group of public, private, industry, and community based environmental service providers that make up the ESANS membership.
